DER FORSCHUNG | DER LEHRE | DER BILDUNG

Research Associate for the Project “The Pricing of Climate Risks in Financial Markets” § 28 Subsection 3 HmbHG

Institution: The Faculty of Business, Economics and Social Sciences, Department of Economics

Salary level: E 13

Start date: 01.11.2022 or as soon as possible

End of employment period: fixed until 31.10.2025

Application deadline: 11.10.2022

Scope of work: part-time

Weekly hours: 75% of standard work hours per week

Repeat call for applications: no

Responsibilities

Duties include academic services in the project named above. Research associates may also pursue independent research and further academic qualifications. They may also pursue doctoral studies outside of working duties.

Specific Duties

The research focus of the group is on the interactions of financial markets, climate economics and asset pricing. Important topics of the project are, for example, the pricing of climate risks, the performance of green and brown assets and the effects of belief differences about climate change on prices and optimal climate policies. The project includes both, theoretical work on state of the art climate finance models as well as empirical work that uses, among others, machine learning techniques to analyze financial market and climate data. The candidate will be a member in a team with a strong research focus in an international network and is offered intensive support for the dissertation project.

Requirements

A university degree in a relevant field.

Required is a master's degree in Economics, Finance, Mathematical Economics or Econometrics. Candidates with prior knowledge of machine learning techniques as well as programming skills (for example in Python, R or Matlab) are preferred. An excellent command of the English language is expected.
